Powered by custom
inference hardware,
**ParlerBox delivers
low-latency responses
for enterprise queries.**

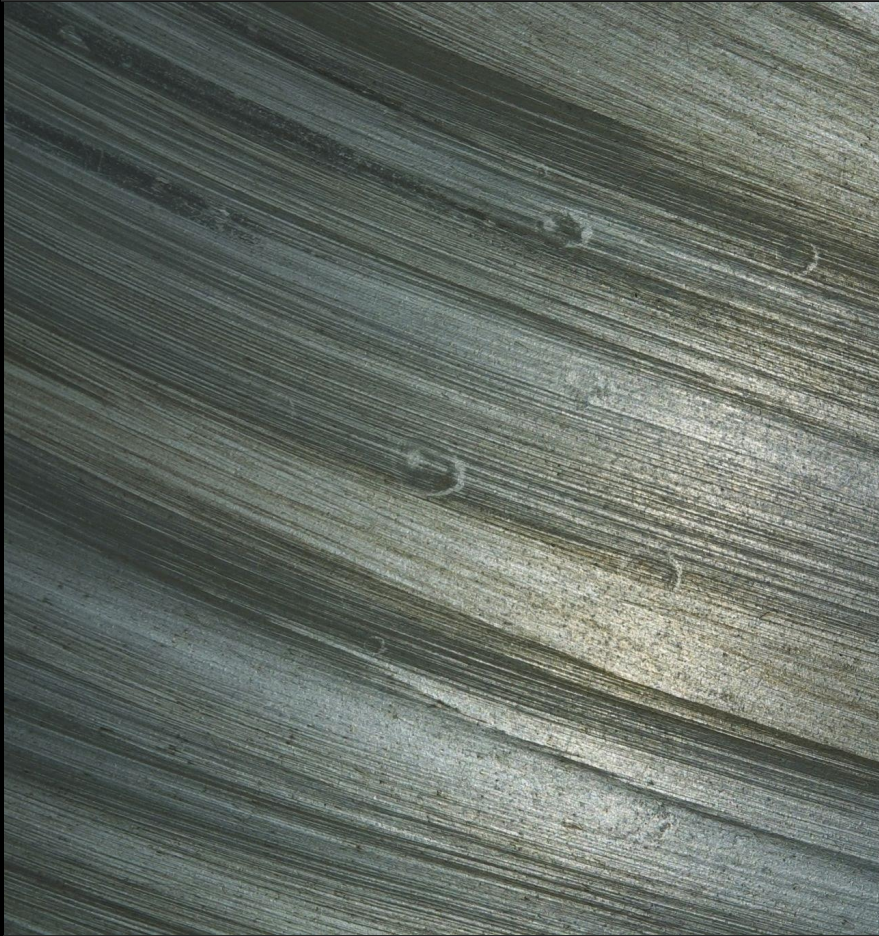

Our mission

ParlerBox is on a mission to give every enterprise the power of instant, ChatGPT-grade search—without ever sacrificing security, compliance, or cost. We believe your data should stay where it belongs: inside your firewall, powering insights instead of cloud bills or repeated, wasted R&D.

We enable you to securely search, chat, and unlock insights from your data with ParlerBox—right inside your firewall.

Current Enterprise Search Solutions Issues

Cloud search bills skyrocket when queries run around the clock.

Cloud services are frequent targets for data breaches.

Enterprises face strict industry and government data regulations.

Teams need insights instantly, but current tools trade off cost, speed, or security.

Internal teams attempting to build solutions from scratch often reinvent the wheel—repeating the same data science work again and again without lasting value.

**Powered by custom
inference hardware,
ParlerBox delivers
low-latency responses
for enterprise queries.**

Our Solution

**Runs fully inside your firewall, even in
air-gapped networks.**

**Connects seamlessly to your files, emails, and
internal systems.**

**Lets you ask natural language questions and
get instant insights.**

**Delivered on custom servers tuned for
high-performance inference.**

Powered by custom inference hardware, ParlerBox delivers low-latency responses for enterprise queries.

Our Solution: How It Works

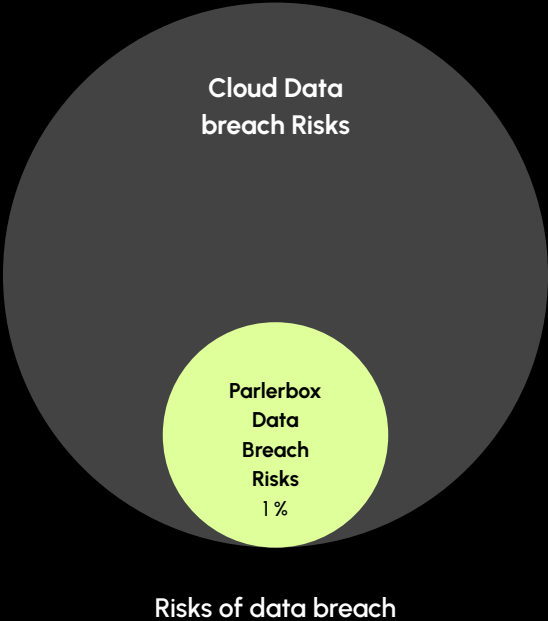

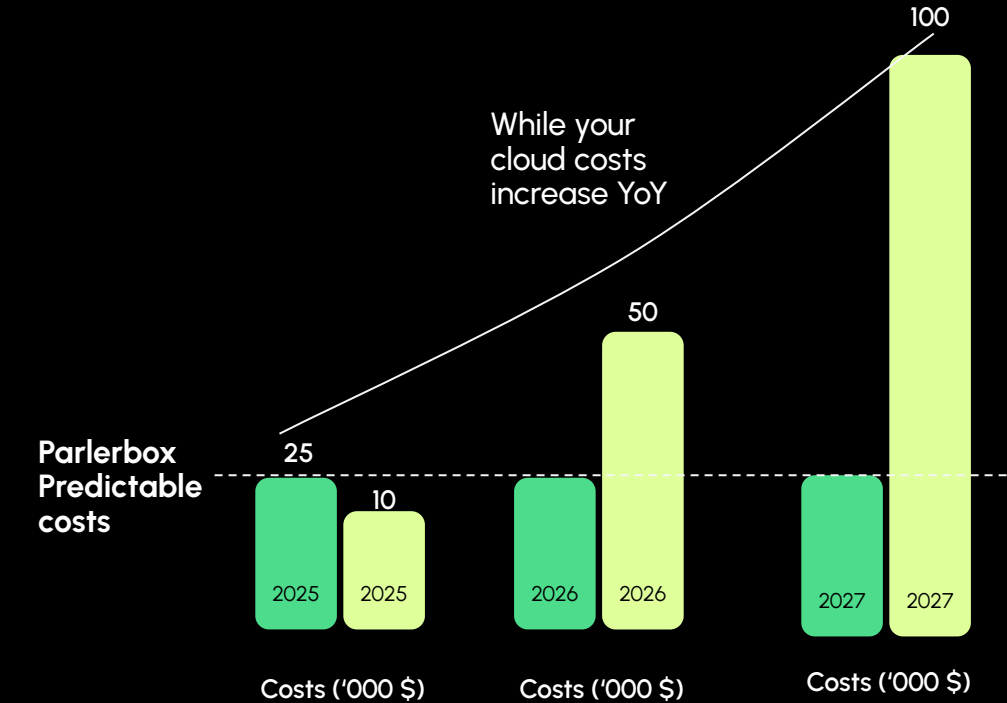

Deploy ParlerBox server onsite or in your private cloud.

Connect to enterprise data sources.

Ingest & Index securely, without data ever leaving your perimeter.

Chat with your data—get insights in seconds.

Benefits of Parlerbox from day 1
